Payscale **Connect**

Connect is a unified support and education experience for the Payscale customer. Access self-service help resources include user guides and release notes documentation for product how-tos, community discussion forums to gain knowledge from peers, and Payscale Academy to check out thoughtful, curated lessons or live training experiences. All resources are designed to help you learn about your Payscale products as well as the world of compensation.

What to expect in Connect

Academy is the on-demand component of a customer's support and education experience with Payscale. Explore guided lesson-based training, thoughtfully designed to help customers learn about their platform as well as important compensation concepts. Registration for live product training webinars and on-demand recordings are also available in Academy. For first time users, watch this welcome video on [How to Use Payscale Academy in Connect](#).

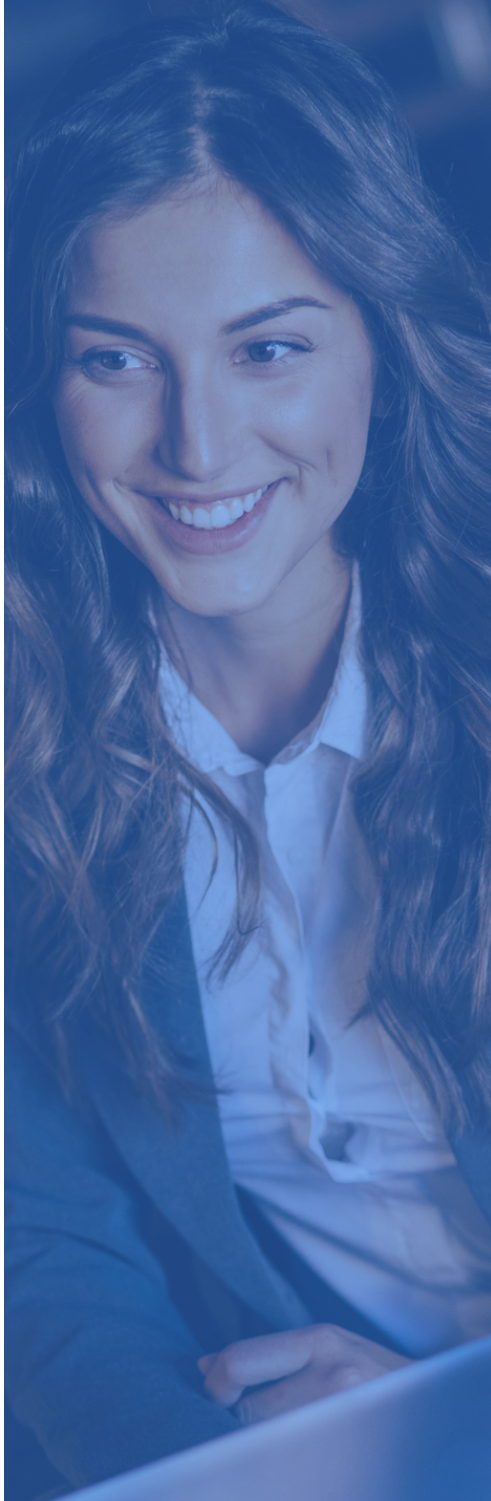

Community discussions are a place to ask questions, find answers, and learn from your peers. Converse about emerging trends, best practices, and share your own insights and solutions. Moderated by Payscale's customer education team, these discussions are valuable for connecting with your peers, for learning product tips, for best practices and strategies for compensation planning, and so much more.

Knowledge Base is your access point for any and all product information. You'll also find helpful tools and resources related to learning Payscale products and compensation in general.

Additionally, manage your Connect experience from **My Dashboard** and **contact support** through Connect with any questions or issues.

Logging in

Be sure to [log into Connect](#) and "**sign in with Payfactors**" at the bottom of the page to engage with your peers, contact product support, increase your expertise with free training, and access customer resources.

Payscale believes that customer-driven feedback drives innovation, and why we have opportunities to provide feedback so we can continually make improvements that matter.

“

We moved from keeping everything on spreadsheets to having one data repository that allows us to analyze the data. The data is easy to upload and once in the tool, is easy to update and customize. The availability to download pretty much any kind of report is amazing for reviews. Start using the tool immediately, easy to use with in-depth features.
